BATTERY WITH PROTECTION CIRCUIT FOR PREVENTING MALFUNCTION

Examiner: Yuan

S.N. 09/967,298

Art Unit: 1745

July 22, 2003

Detailed Action

1. The Applicant's amendment and a substitute specification filed on June 2, 2003 were received. Claim 1 and 2 were amended.
2. The text of those sections of Title 35, U.S.C. code not included in this action can be found in the prior Office Action (Paper No. 5).

Drawings

3. The corrected or substitute drawings were received on June 2, 2003. These drawings are acceptable.

Specification

4. The amendment filed on June 2, 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: [T]he sheet portion and the insulating member of the shield member and intermediated potential electrode form a capacitor.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 1 and dependent claims 2 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The scope of the recitation "...the sheet portion and the insulating member of the shield member and intermediated potential electrode form a capacitor..." in claim 1 is unclear. The definition and location of the term "intermediate electrode" are not disclosed in the instant specification. Instead, the disclosure teaches " ...the negative electrode 1d of the battery 1a, the insulating member 12, and the shield member 13 form the capacitor 7b". See Specification Page 9, Lines 3-7, Page 12, Lines 1-6. This deficiency renders the examination impractical because of the critical nature of the aforementioned term.

Claim Rejections - 35 USC § 102

7. The claim rejections under 35 U.S.C. 102(b) as being anticipated by Takahashi on claim 1 are withdrawn, because the independent claim 1 has been amended.

8. The claim rejections under 35 U.S.C. 102(a) as being anticipated by prior art admitted in the instant disclosure are withdrawn, because the independent claim 1 has been amended.

Response to Arguments

9. Applicant's arguments filed on June 2, 2003 have been fully considered but they are not persuasive.

Applicant's principle arguments are

None of the cited references contain a capacitor specifically formed by the sheet portion, the insulting member of the shield member and the intermediate potential electrode.

In response to Applicant's arguments, please consider the following comments.

The instant specification does not provide support for the amendment. If applicant believes the claim limitation is fully defined, it is requested that applicant indicates column and line, and/or figure with number, identifying the intermediate potential electrode.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1745

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
